GLASS, AN UBIQUITOUS MATERIAL: A WITNESS TO THE PAST, A TOOL FOR BUILDING TOMORROW?

The glass that surrounds us in our daily lives is also a witness to our immediate past (the history of mankind, the age of glass), but it is also a formidable witness to the history of the Earth and the universe. Our glass is a fantastic material, versatile and a transformer of history, and it could represent a major asset for the future, particularly in the fight against climate change: mastering it is becoming a prerequisite for the success of the energy transition! but what is glass?
